PORTFOLIO SUMMARY

Lana Saiful Aqil

Full-Stack Developer • Building Scalable Solutions from Zero to Launch.

I build digital products from the ground up, from solid backend architecture to intuitive interfaces. My main strengths are Laravel, Node.js, React.js, Vue.js, and cloud-native architecture.

Executive Overview

A quick snapshot of work patterns, project distribution, and the stacks that appear most often.

Project Coverage

17 projects from 2021 to 2026, with strong concentration in internal web systems, business products, and landing pages.

Latest Wave

3 latest projects are recorded in 2026, including BPS systems for inventory, guest services, and statistical data processing.

Tech Pattern

The most recurring primary stacks are Laravel, MySQL, Bootstrap, Javascript, TailwindCSS.

PROJECT MIX

Web App	8
Landing Page	6
CMS	2
Machine Learning	1

CORE SKILLS

Frontend

React • Next.js • TypeScript

JavaScript • HTML5 • CSS3 • Tailwind CSS

Backend

Laravel • Node.js • Fastify.js • Express.js

Python • Django • FastAPI • Go

Database

PostgreSQL • MySQL

MongoDB • Redis • InfluxDB • SQLite

Cloud & DevOps

Docker • CPanel • CI/CD

AWS • GitHub Actions • Nginx • Apache

Featured Projects

A selection of the newest or highest-complexity work to give fast context before the full list.

2026 EXPERT

KCA BPS — District in Figures Data Platform

A district-level statistical data input platform for internal BPS use in Tegal Regency. It supports the preparation of annual official publications and includes anomaly testing to identify whether data values are reasonable based on historical patterns.

Laravel MySQL TailwindCSS Data

2026 HARD

POCI BPS — Operational Equipment and Inventory Records System

An internal web application for BPS Tegal Regency to manage office operational inventory. It covers equipment and state asset management, borrowing and returns, plus a transaction history dashboard with filtering and data export.

Laravel MySQL TailwindCSS

2026 MEDIUM

SEPAT BPS — Guest Service System

A digital guest service system for BPS Tegal Regency that replaces the manual guest book. Visitors can check in independently, choose the purpose of their visit, and receive notifications, while admins monitor visits in real time through a dashboard.

PHP Native MySQL TailwindCSS

2025 HARD

ONESHOT — Photobooth System

An interactive web-based photobooth system that lets users capture photos, apply filters, and share them directly to social media. Built with Next.js and MySQL for strong performance and reliable data management.

Next.js MySQL

2024 EXPERT

CAMPUSTODAY — E-Learning Platform

A web-based e-learning platform for CPNS and UTBK exam preparation. It includes tryouts, ranking systems, study materials, expert consultation, and payment gateway integration for premium access.

Laravel React.js

Complete Project List

Sorted from newest to oldest, then by highest difficulty within the same year.

2024 EXPERT

CAMPUSTODAY — E-Learning Platform

A web-based e-learning platform for CPNS and UTBK exam preparation. It includes tryouts, ranking systems, study materials, expert consultation, and payment gateway integration for premium access.

Laravel | React.js | Payment Gateway | Tryout System | E-Learning | Auth

06 • MACHINE LEARNING

2024 HARD

KOFEE — Coffee Leaf Disease Detection

My associate degree final project at UGM: a coffee leaf disease detection system using CNN models ResNet50V2 and InceptionV3. It achieved 92.73% training accuracy, 84.72% validation accuracy, and 86.96% testing accuracy, with diagnosis history and treatment recommendations.

Django | Machine Learning | Python | TensorFlow | ResNet50V2 | InceptionV3 | CNN

07 • WEB APP

2023 HARD

TERAMINA — Shrimp Feed Calculator

A web application that helps shrimp farmers calculate optimal feed composition based on water quality, species, and growth stage. It produces precise feed recommendations to maximize harvest outcomes.

Vue.js | Calculator | Agritech | Responsive

09 • CMS

2022 HARD

RPKPS — Semester Learning Program Plan

A web application that helps universities manage semester learning program plans. It includes document management, lecturer collaboration, and approval workflows to support academic compliance.

Laravel | MySQL | Dashboard | Academic | Auth | REST API

08 • WEB APP

2022 MEDIUM

ONEGAPOS — Cashier Management System

A web-based cashier system designed to simplify sales and inventory management. Features include POS transactions, stock tracking, sales reports, and customer management.

Laravel | Vue.js | REST API | POS | Inventory | Sales Report

10 • CMS

2022 MEDIUM

ALHIJAZ — Hajj Platform

An all-in-one online platform built to simplify the Hajj journey. It includes travel information, booking, permits, personal guidance, virtual reality tours, and interactive maps of Makkah and Madinah.

Laravel | MySQL | CMS | Dashboard | Booking | Bootstrap

11 • LANDING PAGE

2022 EASY

SIGMA HARTEK — Spare Part Landing Page

A company profile website for PT Sigma Hartek, a specialist in industrial spare-part services for pharmaceutical, cosmetic, and food and beverage sectors. It presents core services professionally and clearly.

Bootstrap | Javascript | Company Profile | Responsive

12 • LANDING PAGE

2022 EASY
