---

As a passionate technology enthusiast, I am highly motivated, hard-working, and dedicated to learning. My primary interests lie in software development, with a focus on web development and machine learning. I firmly believe in the philosophy of "better to do something and fail than regret not doing anything" and approach each new challenge with this mindset. Currently based in Yogyakarta, Indonesia, I am eager to contribute my skills and knowledge to a dynamic team of professionals.

---

## Educational Background

### Universitas Gadjah Mada

Bachelor of Software Engineering  
(3.68/4.00)  
2020 - Present

### Bangkit Academy

Machine Learning Path (using
