

SUMMARY

As a passionate technology enthusiast, I am highly motivated, hard-working, and dedicated to learning. My primary interests lie in software development, with a focus on web development and machine learning. I firmly believe in the philosophy of "better to do something and fail than regret not doing anything" and approach each new challenge with this mindset. My ultimate career goal is to become a successful CEO of my own startup company. Currently based in Yogyakarta, Indonesia, I am eager to contribute my skills and knowledge to a dynamic team of professionals.
